GROOVE - the modern collection with a touch of retro. The GROOVE collection pays great attention to detail - a combination of wood and painted surfaces, milled handles, 45-degree angles and edges - all of which gives GROOVE an eye-catching look. GROOVE can be used in different interiors due to different style combination. The GROOVE collection can offer solutions to both living spaces and dining room without problems - it's your freedom to choose.

The milled handles is not only a design solution and a beautiful detail of this collection, but also a convenient functional solution. Furniture uses soft close mechanism. The collection also has a dining table, which can be suitable for both smaller spaces, and with more guests you can easily expand it with the help of a synchronized extension mechanism.

Creating GROOVE was taken into account not only the design and beauty aspects of the furniture, but also the comfort of life.
