Contemporary and minimalistic - that is EDGE. For this collection was used unique combination of wood and laminate. This duo makes these furniture careless and functional. The laminate has waterproof surface which gives opportunity to clean and disinfect the item without any damage to the surface. You can give the collection extra charm by adding wood cassettes or make it simple and ease, just leaving it as it is. Both ways are perfect to give your home a clean, modern and tasteful look. Also, these collection is simple with construction - furniture is made by separate parts which can be joint together and looks like one piece.

The collection consists of a media unit, sideboard, highboard and differend sized tables. Soft close and push to open mechanisms allow to not only enjoy the design of the furniture, but also the quality.
